CAASPP and EAP INFORMATION

1. CAASPP will determine Early Assessment Program (EAP) achievement level providing an indicator of predicted readiness to take college English and Math courses when a student enters a California State University (CSU) school.
 - a. This information will help 11th grade students improve their skills during their 12th grade year.
 - b. Achieving a level 4 on either or both the CAASPP ELA and/or Math will exempt graduating seniors from taking the California State University (CSU) placement tests or Community College placement tests (i.e. Mira Costa).
 - c. Achieving a level 3 will guide students in taking the appropriate Math course(s) during their 12th grade year so that they are prepared to move into college level course their first year in college.
2. Students and parents are encouraged to release their CAASPP scores.
 - a. This is a simple step during the CAASPP assessment indicating the release of scores.
 - b. This is completely optional.
 - c. If CAASPP scores are not released, in order to not take Math and/or English college placement tests, students must provide a copy of the student's CAASPP Score Report to that institution.
